Risk assessment for : Leeds Wood Recycling Cic

Risk assessment name	Makita Red Orbital Sander	Assessment type	General
Assessor name	Leon Varga	Affected site(s)	Leeds Wood Recycling CIC (LS11 9RT)
Assessment date	27/03/2023	Review period	Annually
Approved by	Leon Varga	Review date	27/03/2024
Approved date	27/03/2023	Reference	LEE1778097

Workspace(s)	Description
Processing	This risk assessment will explain the risks and hazards associated with using a Makita Red Orbital Sander and the procedures in place to minimise risk.

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
Electricity (240 volts) Risk of injury due to faulty equipment, contact with live electrical components or improper use.	All staff How? Risk of injury due to faulty equipment, contact with live electrical components or improper use.	Electrical Cable Management In Place Electrical cable management in place ensuring no trailing wires in the workplace reducing trip risks Electrical Fixed Mains Wiring Inspection Performed Fixed mains wiring inspection carried out to the requirements of BS 7671 Electrical Warning Signage In Place Electrical Warning Signage In Place Electrical Warning Cables Is Avoided/Minimised The Use Of Trailing Cables Is Avoided/Minimised	1 x 8 8 Low

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
Manual handling Risk of injury whilst undertaking the manual handing of tall, awkward & unwieldy loads.	All staff How? Risk of injury whilst undertaking the manual handing of tall, awkward & unwieldy loads.	Foot Protection Worn Foot protection supplied & worn to BS EN 20345 relevant to the work activity hazard Manual Handling - Team Lifting Team lifting will be applied as required Foot Protection Worn Foot protection worn Gloves Worn - EN 388 Mechanical Risks (Abrasion) Gloves Worn - EN 388 Mechanical Risks (Abrasion Resistant) Manual Handling - Trolley Truck Provided & Used Manual Handling - Trolley Truck Provided & Used	1 x 2 2 Low
		Manual Handling Training Given All relevant employees have received training on correct manual handling techniques Split Loads To Reduce The Manual Handling Risks Loads are split into lighter load weights to reduce manual handling risks	
		Storage Plan To Reduce Manual Handling Operations Storage plan in place to reduce the risk from manual handling operations whilst picking stock.

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
Particles & Dust etc. From Tools Activity may cause residue/debris that could make contact or be inhaled, causing further health issues.	All staff How? Activity may cause residue/debris that could make contact or be inhaled, causing further health issues.	Eye Protection Worn Eye protection supplied to BS EN 166 & relevant to the work activity hazard Eye/Face Guard Worn Eye/face guard worn to protect both eyes and face against the risk of debris and/or splashes RPE - Disposable Respirator FFP 3 Protects against fine dust, mists & fumes (FFP1 - APF of 4; FFP2 - APF of 10 & FFP3 - APF of 20) RPE Is Face-Fit Tested RPE, used to protect workers from identifiable diseases, is "face-fit" tested by a competent person. Shadow Vacuuming/On-Tool Extraction To Reduce Dust Shadow vacuuming/on-tool extraction employed whilst using power tools to minimise harmful dusts	3 x 2 6 Low
People Movement (Risk of Slips) Risk of injury due to a variety of access/egress hazards that can cause slips.	All staff, Members of the public How Many? All How? Risk of injury due to a variety of access/egress hazards that can cause slips.	Floor Not Left Wet After Cleaning To Prevent Slips Wet floors not left after cleaning - clean them to a completely dry finish Spillage Procedure In Place Spillage procedure in place Spillages Cleaned Up Immediately Spillages Cleaned Up Immediately	1 x 7 7 Low
		Warning & Information Signage Displayed Relevant warning & information signage displayed relative to the work activity, hazard & risks Wet Floors Are Taken Out Of Traffic Routes During cleaning operations, wet surfaces are kept from traffic routes by barriers and/or signage	

Makita Red Orbital Sander Page 6 of 9

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
People Movement (Risk of Trips & Falls) Risk of injury due to a variety of access/egress hazards that can cause trips & falls	All staff How? Risk of injury due to a variety of access/egress hazards that can cause trips & falls	All aisles and gangways kept clear to avoid slips and trips Good Housekeeping Observed During The Task Good housekeeping standards observed & maintained by operatives throughout the duration of the task Suitable & Sufficient Internal Lighting Provided Suitable & sufficient lighting provided for the workplace activities Trailing Wires/Cables Made Safe To Prevent Trips Leads & extension cables are routed and/or secured/taped to minimise trip risks	1 x 7 7 Low
Poor Housekeeping Risk of injury during access & egress due to poor housekeeping.	All staff How? Risk of injury during access & egress due to poor housekeeping.	All Staff Trained In Good Housekeeping Techniques All staff are trained in good housekeeping techniques & the standards expected in the workplace Regular Housekeeping Inspections Are Carried Out Regular housekeeping inspections are carried out in the workplace. Good Housekeeping Observed During The Task Good housekeeping standards observed & maintained by operatives throughout the duration of the task	1 x 7 7 Low

Makita Red Orbital Sander Page 7 of 9

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
Work Equipment (Hand Held Power Tools) Risk of injury (cuts, abrasions, eye injury etc.) by using hand-held power tools	All staff How? Risk of injury (cuts, abrasions, eye injury etc.) by using hand-held power tools	Appropriate First Aid Provided Casualties treated by first aider until emergency help arrives Entanglement Avoidance Rules In Place All loose clothing, jewellery (watches / rings / necklaces) is removed & long hair is tied back Good Housekeeping Observed During The Task Good housekeeping standards observed & maintained by operatives Hearing protection available and to be worn whilst carrying out noisy work	1 x 7 7 Low
		Only Competent Persons Can Operate The Equipment Only personnel with sufficient information, instruction and training can operate the equipment. Only personnel with sufficient information, instruction and training can operate the equipment.	
		Protective Screens Provided & Used Protective Screens Provided & Used Protective Screens Provided & Used RPE - Disposable Respirator FFP 3 Protects against fine dust, mists & fumes (FFP1 - APF of 4; FFP2 - APF of 10 & FFP3 - APF of 20)	

Further control measures

Operating procedures

Must have completed the workshop induction and modules 1 and 3 before use. Operator must be trained by a competent person and only trained individuals are allowed to use the machine. PTL must be signed. Correct PPE must be worn as well as face fit tested RPE. Risk assessment must be read before use.
