

Risk assessment name	Risk Assessment - MITRE CHOP SAW MAKITA LS1219L - 2023	Assessment type	General
Assessor name	Charlotte Stanley	Affected site(s)	Leeds Wood Recycling CIC (LS11 9RT)
Assessment date	17/04/2023	Review period	Annually
Approved by	Charlotte Stanley	Review date	17/04/2024
Approved date	17/04/2023	Reference	LEE1796681

Workspace(s)	Description
Processing	This Risk Assessment is on the safe practices of using the Mitre Chop Saw

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
Electricity (240 volts & 3 Phase 415 volts) Risk of injury due to faulty equipment, contact with live electrical components or improper use.	All staff  How? Risk of injury due to faulty equipment, contact with live electrical components or improper use.	Electrical Distribution Board Access Is Secure Unauthorised access to the electrical distribution board is prevented  Electrical Safety Check (PAT) Undertaken Electrical safety check undertaken for portable appliances  Electrical Distribution Board Access Is Secure Unauthorised access to the electrical Inspection Performed Fixed mains wiring inspection carried out to the requirements of BS 7671	1 x 8 8 Low

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
Fire Risk of injury caused by naked flames, faulty electrical equipment, arson, explosion or chemicals.	All staff  How? Risk of injury caused by naked flames, faulty electrical equipment, arson, explosion or chemicals.	Fire Exits & Fire Exit Signage Maintained Fire exits & signage maintained & displayed to show the way to the nearest safe final exit.  Fire Risk Assessment In Place A fire risk assessment has been carried out denoting the fire hazards & appropriate control measures  Fire Extinguishers Provided In Areas of High Risk Fire extinguishers provided In areas of higher risk due to the work activity (e.g. welding booths).  Fire Training Carried Out Fire training (including evacuation) carried out at Induction and refreshed periodically	1 x 9 9 Low
Hand Arm Vibration < <enter &="" dosage="" time="">&gt;m/s2 Excessive exposure to vibrating tools may cause health issues such as Hand Arm Vibration Syndrome</enter>	Operators  How? Excessive exposure to vibrating tools may cause health issues such as Hand Arm Vibration Syndrome	Hand Arm Vibration Control <-enter time of use>> Hand Arm Vibration is controlled through the measurement of the vibration dosage & time permitted  Self-Check For Hand Arm Vibration Syndrome Operatives self-check for Hand Arm Vibration Syndrome and report accordingly  Hand Arm Vibration Training Given Information, instruction and training is given to employees using vibrating tools in the workplace.  Tools With Excessive Hand Arm Vibration Not Used Operatives are not to use vibrating tools unless the vibration dosage/time to meet the ELV is known.	1 x 7 7 Low

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
	Operators  How? Risk of injury whilst undertaking the manual	Appropriate First Aid Provided Casualties treated by first aider until emergency help arrives  Gloves Worn - EN 388 Mechanical Risks (Abrasion) Gloves Worn - EN 388 Mechanical Risks (Abrasion Resistant)	1 x 7
Manual Handling of Wood/Wood Products Risk of injury whilst undertaking the manual handing of wood & wood products	handing of wood & wood products	Manual Handling - Team Lifting  Team lifting will be applied as required  Manual Handling - Trolley Truck  Provided & Used  Manual Handling - Trolley Truck  Provided & Used	Low
		Manual Handling - Trolley Truck Provided & Used  Manual Handling - Trolley Truck Provided & Used  Manual Handling - Trolley Truck Provided & Used  Manual Handling Training Given All relevant employees have received training on correct manual handling techniques	
		Protective Footwear Worn Whilst Manual Handling Suitable protective footwear is worn whilst carrying out manual handling activity.  Split Loads To Reduce The Manual Handling Risks Loads are split into lighter load weights to reduce manual handling risks	
		Storage Plan To Reduce Manual Handling Operations Storage plan in place to reduce the risk from manual handling operations whilst picking stock.	

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
Noise levels at/above 85 dB(A) Risk of hearing damage due to exposure to excessive levels of noise.	All staff  How? Risk of hearing damage due to exposure to excessive levels of noise.	All Employees Receive Induction Training All employees receive induction training upon commencement with the Company  Hearing protection available and to be worn whilst carrying out noisy work activities  Hearing Protection available and to be worn whilst carrying out noisy work activities  Mandatory Hearing Protection Zones Designated  Mandatory hearing protection zones designated as noise levels are 85dB(A) and above in the area.	1 x 8 <b>8</b> Low
Particles/Debris Ejected From Work Equipment/Tools Risk of injury/ill-health due to dust/particles being ejected during the processing activities.	All staff  How? Risk of injury/ill-health due to dust/particles being ejected during the processing activities.	Eye Protection Worn Eye protection supplied to BS EN 166 & relevant to the work activity hazard  Good Hand Washing/Hygiene Procedures Observed Good hand washing procedures observed to reduce the risk of skin disorders and promote good hygiene  Suitable & Sufficient Welfare Facilities Provided  To include hot/cold water, soap, means of drying, well ventilated and kept in an orderly condition.  Eye Wash Station Provided  Eye wash station provided Eye wash station provided for first aid treatment for debris/dust etc. in eyes.  Protective Clothing Must Be Worn  Protective Clothing Must Be Worn  Protective Clothing Must Be Worn	1 x 7 7 Low

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
People Movement (Risk of Slips) Risk of injury due to a variety of access/egress hazards that can cause slips.	All staff  How? Risk of injury due to a variety of access/egress hazards that can cause slips.	All Staff Trained In Good Housekeeping Techniques All staff are trained in good housekeeping techniques & the standards expected in the workplace  Spillages Cleaned Up Immediately Spillages Cleaned Up Immediately	1 x 7 7
People Movement (Risk of Trips & Falls) Risk of injury due to a variety of access/egress hazards that can cause trips & falls	All staff  How? Risk of injury due to a variety of access/egress hazards that can cause trips & falls	All aisles and gangways kept clear to avoid slips and trips  All staff Trained In Good Housekeeping Techniques  All staff are trained in good housekeeping techniques & the standards expected in the workplace  Good Housekeeping Observed During The Task  Good housekeeping standards observed & maintained by operatives throughout the duration of the task  All Staff Trained In Good Housekeeping Techniques  All staff are trained in good housekeeping techniques & the standards expected in the workplace  Suitable & Sufficient Internal Lighting Provided  Suitable & sufficient lighting provided for the workplace activities	1 x 7 7 Low
Poor Housekeeping Risk of injury during access & egress due to poor housekeeping.	All staff  How? Risk of injury during access & egress due to poor housekeeping.	All Staff Trained In Good Housekeeping Techniques All staff are trained in good housekeeping techniques & the standards expected in the workplace  Good Housekeeping Observed During The Task Good housekeeping standards observed & maintained by operatives throughout the duration of the task  Cleaning Schedules in Operation Cleaning Schedules in Operation Regular Housekeeping Inspections Are Carried Out Regular housekeeping inspections are carried out in the workplace.	1 x 7 7 Low

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
	All staff  How? Inappropriate use and storage of implements	Appropriate First Aid Provided Casualties treated by first aider until emergency help arrives  Gloves Worn - EN 388 Mechanical Risks (Cut Resist) Gloves Worn - EN 388 Mechanical Risks (Cut Resistant)	1 x 7
Sharp Tools/Cutting Blades Inappropriate use and storage of implements could cause injuries such as cuts to hands and fingers.	could cause injuries such as cuts to hands and fingers.	Provision Of Written Safe Systems of Work In Place For Handling Sharp Tooling/Blades  Provisions of written Safe Systems of Work to control the process with the minimum risk of injury  Storage System In Place To Reduce Risk Of Injury  Storage System In Place To Reduce Risk Of Injury	Low

Hazard	Who could be harmed and how?	Existin	g controls			Risk rating (L x S)
Wood Dust	All staff  How? Risk of ill-health due to the inhalation of harmful soft/hard wood & M.D.F.		All Employees Receive Induction Training All employees receive induction training upon commencement with the Company		Cleaning Schedules in Operation Cleaning Schedules in Operation	1 x 8
Risk of ill-health due to the inhalation of harmful soft/hard wood & M.D.F. dust.	dust.	Ö	Cleaning tasks planned Correct Disposal of Wood Dust,	Materials & Waste Waste materials are disposed of in	Low	
		0	Do Not Use Brooms To Sweep Up The use of brooms is not allowed to sweep up wood dust from the floor.		Local Exhaust Ventilation Provided For The Task Local Exhaust Ventilation Provided For The Task	
			Provision Of Written Safe Systems of Work In Place Provisions of written Safe Systems of Work to control the process with the minimum risk of injury		RPE - Disposable Respirator FFP 3 Protects against fine dust, mists & fumes - FFP3 up to 50x TLV	
			RPE Is Face-Fit Tested  RPE, used to protect workers from identifiable diseases, is "face-fit" tested by a competent person.	THE WALL	Statutory Inspection On Local Exhaust Ventilation  Local Exhaust Ventilation Tested in accordance with the statutory requirement for the work/type.	
			Wood Dust Control  Dust extraction is fitted to the machinery & vacuums are provided to remove dust from flooring			

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
Work Equipment - Woodworking	Operators  How? Risk of injury due to contact with blades & ill health due to the	Appropriate First Aid Provided Casualties treated by first aider until emergency help arrives  Authorised Persons Only To Operate The Equipment Only operated by persons that have received adequate training & authorised to use the equipment	1 x 8 <b>8</b>
Machinery Risk of injury due to contact with blades & ill health due to the inhalation of wood dust created.	inhalation of wood dust created.	Barriers In Place To Prevent Unauthorised Access  Barriers In Place To Prevent Unauthorised Access  Do Not Wear Gloves The operative should not be wearing gloves as there is a risk of entanglement in the machine.	Low
		Electrical Supply Isolated At Mains/Breaker When Not In Use The machine is switched off at the mains when not in use to prevent inadvertent usage  Entanglement Avoidance Rules In Place All loose clothing, jewellery (watches / rings / necklaces) is removed & long hair is tied back	
		Eye Protection Worn  Eye protection supplied to BS EN 166 & relevant to the work activity hazard  Fixed/Interlock Guards in Place At All Times  Fixed/interlock guards are in place at all times & regularly checked.	
		Guards Checked Prior To Machinery Use  All safety devices checked regularly to ensure that they are fully operationalto include any adjustable guarding in place.  Limited Cutter Projection Tooling In Use  Limited cutter projection tooling significantly reduces the severity of injury if there is bodily contact with the cutting tools/blade.	
		Machine Fitted With Automatic Braking Device  Automatic brake is fitted that stops the tool in ten seconds or less if there is a risk of contact  Only Competent Persons Can Operate The Machine Only personnel with sufficient information, instruction and training can operate the machine	

Hazard	Who could be harmed and how?	Existing controls	Risk rating (L x S)
		Operators Trained In Safe Operation Of Equipment Operators receive adequate information, instruction & training for safely operating the equipment to include the dangers of "kickback".	
		Routine Maintenance Undertaken Routine maintenance is undertaken in accordance with the manufacturer's requirements  RPE - Disposable Respirator FFP 3 Protects against fine dust, mists & fumes - FFP3 up to 50x TLV	
		Safe System of Work In Place For The Task & Specified Hazards (WIS Sheets)  Operatives work to the Safe System Of Work in place for the safe operation of the task such (e.g. the relevant HSE WIS Sheets for the machine).  Suitable & Sufficient Internal Lighting Provided Suitable & sufficient lighting provided for the workplace activities	
		Suitable Returns Device/System Allowing No Access to The Blade Whilst At Rest  A suitable returns device/system is installed that allows no access to the blade whilst the machine is at rest  Supervision Provided For The Task Supervision provided for the task	
		Warning & Information Signage Displayed Relevant warning & information signage displayed relative to the work activity, hazard & risks	

## **Further control measures**

None required
